MANUFACTURING**

September 10-12, 2019 | Chiyoda, Tokyo, Japan

Japanese AM Peer Event

From Aachen to Tokyo – ACAM brings Japanese companies know-how in Additive Manufacturing

The event aims to connect Japanese companies with our experts from RWTH Aachen Campus while promoting a non-biased environment to share, discuss and learn about Additive Manufacturing and its applications in the Japanese industry.

The ACAM Peer Event is a 3-day event that will take place in September. Its agenda includes:

September 10, 2019 – AM Peer Forum (exclusive for ACAM Members)

ACAM welcomes its Japanese members to the AM Peer Forum. Besides presenting academic and industrial advances, in the event participants will also be invited to contribute with demands for future developments.

September 11-12, 2019 – AM Peer Seminar

Join us for two days full of technological and commercial insights on the latest global AM developments and gain a deeper understanding of the opportunities, challenges and best practices related to this disruptive technology. Network with major Japanese AM stakeholders and establish new business relationships.

You don't need to be a member of ACAM to attend the AM Peer Seminar. However, ACAM membership gives you price advantages.
