

DVS Specialist for Additive Manufacturing

Seminar and further Education

Content

- Fast-growing technology environment with few trained specialists
- employment opportunities possible in small and large companies
- Seminar includes focus on metal or plastics

Agenda

- Technical terms and process principles
- Fields of application and markets
- the most important additive manufacturing processes
- Set-up and operation of systems as well as occupational health and safety
- Data preparation and process parameters
- Construction process, construction process monitoring and troubleshooting
- Post-processing and quality assurance

When and Where?

- Metal: 20.-24.03.2023
25.-29.09.2023
- Polymer 24.-28.04.2023
06.-10.11.2023
